

Iniciativas brasileiras de publicações digitais

The Open Web Platform and its technologies
have become essential to how content is
created, developed, enhanced, discovered,
disseminated, and consumed online and offline.

JEFF JAFFE, W3C CEO

PUBLISHING@W3C

“A Plataforma Web Aberta e suas tecnologias se tornaram essenciais para como o conteúdo é criado, desenvolvido, aprimorado, descoberto, disseminado e consumido online e offline”

Publishing Working Group

The mission of the Publishing Working Group is to enable all publications—with all their specificities and traditions—to become first-class entities on the Web. The group will provide the necessary technologies on the Open Web Platform to make the combination of traditional publishing and the Web complete in terms of accessibility, usability, portability, distribution, archiving, offline access, and reliable cross referencing.

The Co-Chairs of the Working Group are [Tzviya Siegman](#) (Wiley), and [Garth Conboy](#) (Google). The W3C Staff Contact for the Working Group is [Ivan Herman](#). The group is chartered until the 1st of July, 2020.

Publishing WG Telco, 2018-03-05: DPUB ARIA, extensions, EPUB 3.2

Tue Mar 06 2018

See minutes online for a more detailed record of the discussions. DPUB ARIA; general extensions DPUB ARIA 2.0 is on the WG's charter, but there were discussions considering what it actually means to be in the ARIA spec, and which ... [Continue reading](#) →

Working Group

Web Publications

This specification defines a Web Resource representing a collection of one or more constituent Web Resources, organized together in a uniquely identifiable grouping that may be presented using standard Open Web Platform technologies. A Web Publication may represent a journal or magazine article, an in-house documentation, or a digital book. It provides a standard to access information pertinent for the collection as a whole and that may be usable for the proper presentation of the publication.

Packaged Web Publications

This specification defines a way to combine the resources of a Web Publication into a distributable file using a packaging format. Note that if the [Packaging on the Web](#) work leads to a W3C Recommendation and fulfills all the requirements for Packaged Web Publications, publishing this deliverable *may* become unnecessary.

EPUB 4

This specification defines a functional *profile* of the general idea of Packaged Web Publications that may deliver a higher degree of comprehensive accessibility capabilities and reliability. This specification should generally be a functional superset of EPUB 3.1. Functional round-tripping to/from EPUB 3.1 considered highly desirable.

DPUB-ARIA Module 2.0

This specification extends the [DPUB-ARIA Module 1.0](#) specification, adding terms for a more complete coverage of publication-related terms. Its primary input is the full set of terms defined by the [EPUB 3 Structural Semantics Vocabulary](#) but other, similar vocabularies will also be considered.

Community Group

The screenshot shows the W3C website interface for the Brazilian Publishing Community Group. At the top, there is a navigation bar with links for 'Skip', 'Log In', and 'My W3C Account'. Below this is a banner with the W3C logo and the text 'COMMUNITY & BUSINESS GROUPS'. The main content area features a section for the 'BRAZILIAN PUBLISHING COMMUNITY GROUP' with a detailed description of its purpose and a note about community group operations. To the right, there are navigation links for 'CURRENT GROUPS', 'REPORTS', and 'ABOUT', along with a 'Tools for this group' section listing 'Mailing List', 'IRC', 'RSS', and 'Contact This Group'. A 'Get involved' section provides information on joining the group and signing the contributor license agreement. At the bottom, there is a 'JOIN OR LEAVE THIS GROUP' button and a status indicator 'No Reports Yet Published'.

BRAZILIAN PUBLISHING COMMUNITY GROUP

The purpose of the Brazilian's community group is to promote and foster the discussions around digital publications in Brazil, stimulate the adoption of the EPUB 3.1 standard by publishers and developers. The local group will translate W3C documents, guidelines and specifications to minimize barriers with the non-native language and help in the understanding of the standards for a growing number of people. It is also the responsibility of this group, bring questions and pertinent feedback to W3C's Publishing Working Group. The group will organize regular meetings and events to mobilize more and more participants in local debates and also as a way to stimulate the EPUB 3.1 adoption by the Brazilian publishing industry. This group will not publish original Specifications.

Note: Community Groups are proposed and run by the community. Although W3C hosts these conversations, the groups do not necessarily represent the views of the W3C Membership or staff.

Community Group

The screenshot shows the GitHub interface for the repository `W3CBrasil/guia-epub`. At the top, there are navigation links for "This repository", "Search", "Pull requests", "Issues", "Marketplace", and "Explore". The repository name is displayed as `W3CBrasil / guia-epub` with 6 Unwatch, 4 Star, and 2 Fork actions. Below this, there are tabs for "Code", "Issues (5)", "Pull requests (0)", "Projects (0)", "Wiki", "Insights", and "Settings".

The repository description is "Repositório para a elaboração do 'Guia de Boas Práticas em Publicações Digitais' do Brazilian Publishing Community Group". It has 25 commits, 1 branch, 0 releases, and 2 contributors. The current branch is `master`, and there are buttons for "New pull request", "Create new file", "Upload files", "Find file", and "Clone or download".

The commit history shows a recent commit by `reinaldoferraz` titled "adicionando referências de vídeo" on Feb 7. The commit message is "adicionando referências de vídeo". The files changed in this commit are `README.md` (revisao) and `acessibilidade.md` (adicionando referências de vídeo).

The `README.md` content is displayed below, featuring the title "Guia de Boas Práticas em Publicações Digitais" and the following text:

Repositório para a elaboração do "Guia de Boas Práticas em Publicações Digitais" do Brazilian Publishing Community Group. Utilizaremos este repositório para receber sugestões e estruturar o documento base para iniciar o desenvolvimento do documento.

Será utilizada como base a documentação do ePub 3.0 (<http://idpf.org/epub/30>).
